

## System Management

### FOR PROCEDURE CHANGE PROPOSAL PPCL0024

Following the closure of the public consultation period for the Procedure Change Proposal PSOP: Monitoring and Reporting Protocol, the IMO have suggested that System Management provide a further consultation period in regards to additional amendments to the PSOP, further details of which are provided below.

System Management acknowledges that section 2.10 of the Market Rules does not specifically contemplate a second consultation period for a Procedure Change Proposal. However, after discussions with the IMO, System Management considers it appropriate to undertake a further informal consultation process to allow interested parties to make submissions on the revised PSOP presented.

Any informal submissions must be delivered to the IMO ([market.development@imowa.com.au](mailto:market.development@imowa.com.au)) by **5:00pm on Monday, 1 July 2013**.

#### Revised Procedure

System Management has proposed the following further amendments to the PSOP:

During the formal consultation process, the following feedback was provided by Alinta in its submission:

*"....Alinta notes that it has discussed directly with both System Management and the IMO the continued need for a separate consultation process on any changes to the Tolerance Range formula. Given the inclusion of the formula in the PSOP (which is therefore subject to a procedure change process if amendments are proposed) this additional consultation process is no longer necessary. Alinta therefore supports the removal of the requirements for a separate consultation process on the Tolerance Ranges...."*

System Management has considered Alinta's views and amended Section 4.4 of the PSOP: Monitoring and Reporting Protocol relating to a separate consultation process for the Annual Review of the Tolerance Range as detailed below:

#### 4.4 Changes to Tolerance Ranges and Facility Tolerance Ranges

1. System Management must review the Tolerance Range and all Facility Tolerance Ranges at least annually **[MR2.13.6G]**. ~~System Management must follow the same consultation process as outlined in Paragraphs 4.2.1 to 4.2.3 of this Procedure for a Tolerance Range and Paragraphs 4.3.5 to 4.3.7 for a Facility Tolerance Range(s) prior to varying a Tolerance Range and/or a specific Facility Tolerance Range(s).~~
2. Following a review, System Management may vary the Tolerance Range or a specific Facility Tolerance Range(s) **[MR 2.13.6G]**. Varied

Tolerance Range and Facility Tolerance Range(s) are effective from the date specified by System Management, as published by the IMO on the Market Web Site **[MR 2.13.6D & MR 2.13.6E]**.

3. If the varied Tolerance Range is only the result of changes to the NPC or ROC Standing Data items for a Facility or Facilities but there is no change to the formula specified in Section 4.1.1 of this PSOP, then System Management must provide the IMO with the revised Tolerance Range amounts prior to their effective date.
4. Where System Management proposes to vary the Tolerance Range formula specified in Section 4.1.1 of this PSOP, it will be required to carry out the Procedure Change process in accordance with clause 2.10 of the Market Rules and the Market Procedure for Procedure Administration prior to the varied Tolerance Range formula taking effect.
5. Where System Management proposes to vary the Facility Tolerance Range it must follow the same consultation process as outlined in Paragraphs 4.3.5 to 4.3.7 prior to the varied Facility Tolerance Range(s) taking effect.
- ~~3.~~ 6. Where the IMO gives a direction to System Management to vary a specific Facility Tolerance Range in accordance with the Market Rules **[MR 2.13.6H & MR 2.13.6I]**, that direction must apply until the Facility Tolerance Range is varied in accordance with the Market Rules **[MR 2.13.6G]**.
